Special Issue

Research and Application of Conductive Polymer Materials

Message from the Guest Editors

In recent years, an increase in interest in the issue of printed electronics from scientists, printed electronics, and consumer electronics companies has been observed. This interest translates directly into the development of electroponditating polymers. More and more extensive tests are being conducted to learn about the structure as well as implantation properties of electroponditating polymers. In addition, the development of other technologies for applying or introducing nanododates into polymers caused a strong development in this scientific field.
The Special Issue "Research and Application of Conductive Polymer Materials" is devoted to all aspects of science and technology of electroponditrium polymers, including, among others, integration in textile and glass structures, for applications in fibrinity, car industries, furniture, intelligent materials, environmentally friendly materials, , and new approaches to testing, methodology, processing and production techniques, printing, aging, and recycling.

Guest Editors

Prof. Dr. Ewa Skrzetuska

Prof. Dr. Eulalia Gliścińska

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
