

Special Issue

Latest Advances in Asphalt Materials in Modification and Performance Evaluation

Message from the Guest Editors

We invite you to contribute to the upcoming Special Issue titled "Latest Advances in Asphalt Materials in Modification and Performance Evaluation", which seeks to showcase the most recent developments and research in the design, modification, and performance assessment of asphalt materials. This Special Issue welcomes original research articles, reviews, and case studies focusing on innovative materials and technologies aimed at enhancing the performance and sustainability of asphalt binders and mixtures. Topics of interest include, but are not limited to the following:

- Polymer-, bio-, and nano-modified asphalts
- Rejuvenators and recycling technologies
- Aging, moisture damage, and cracking resistance
- Performance evaluation methods (laboratory and field)
- Mechanistic-empirical modeling and life-cycle assessment
- Smart materials and data-driven design approaches

Guest Editors

Dr. Fan Zhang

Dr. Dongdong Yuan

Dr. Di Wang

Dr. Augusto Cannone Falchetto

Deadline for manuscript submissions

20 November 2025

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
