

Special Issue

Metal Oxide Semiconductors for Electronic Applications

Message from the Guest Editors

New era concepts of Internet of things (IoT) and smart surfaces are now demanding transparent, flexible, and nanoscale devices and materials. In this regard, metal oxides have emerged as key materials, since they present good reproducibility, large-area uniformity, and lower fabrication temperatures and costs.

This Special Issue aims to collect original papers and/or review articles focused on the fabrication of metal oxide semiconductors, in both the form of thin films or nanostructures, and their application in electronics.

Relevant topics may include (but are not limited to):

- Metal oxide semiconductors characterization and fabrication;
- Sustainable materials and processes;
- Advances in the integration of metal oxide semiconductor nanostructures;
- Transparent and flexible electronics;
- Electronic devices such as field effect transistors, memristors, sensors, nanogenerators, and photodetectors;
- Application of metal oxide semiconductors to electronic circuits or systems;
- Devices' modelling and simulation.

Guest Editors

Dr. Ana Rovisco

Dr. Jorge Martins

Dr. Asal Kiazadeh

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
