Special Issue

New Generation Materials for Advanced Electronic and Biomedical Applications

Message from the Guest Editors

The design and synthesis of new inorganic and organic materials and composites with predetermined optical, electrical, mechanical and magnetic properties for electronic and biomedical applications is crucial. This Special Issue aims to gather recent research results regarding the appropriate initial composition of a wide variety of organic and inorganic materials, as well as their composites. It will also address the preparation of these composites via a range of experimental techniques. This Special Issue also aims to provide a brief review of the methods most often used to characterize the phase composition, structure and physical properties of the obtained materials, as well as introduce methods that optimize the process of characterizing and manipulating the surface of the synthesized materials. The scope of this Special Issue includes, but is not limited to, the following topics: 1. Bulk glasses and glass-ceramics for electronic and opto-electronic applications; 2.Bulk glasses, ceramics and composites for biomedicine; 3.Surface modification and methods for the characterization of materials.

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma
State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
