

Special Issue

Functional Polymeric Materials and Green Chemistry

Message from the Guest Editors

This Special Issue will highlight recent advances in functional polymeric materials and green chemistry that have been developed in various fields of science and industry, including material design, chemistry and synthesis, material characteristics, processing, and applications. The main topics include but are not limited to:

- Smart and high-performance polymeric materials;
- Green chemistry for functional polymeric materials;
- Sustainable, bio-based polymeric materials;
- Polymeric materials for additive manufacturing.

It is my pleasure to invite you to submit a manuscript to this Special Issue of *Materials*. Submissions of communications, full papers, and reviews are all welcome.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.
