Special Issue

Electronic and Optical Properties of Heterostructures, Second Edition

Message from the Guest Editor

A deep understanding of the electronic and optical properties of heterostructures is becoming increasingly crucial to a wide range of applications in modern electronic, optoelectronic, spintronic, and valleytronic devices. Therefore, the selection of a proper method for characterizing these structures is very important to understanding these properties. Various heterostructures exhibit different synergistic relationships between two or more structural elements that improve their functional properties. The interplay between the fabrication parameters and their optical and electrical properties can be evaluated using several characterization methods, including, inter alia, Raman, X-ray photoelectron, photoluminescence, and capacitance spectroscopy. In this Special Issue, we aim to highlight and discuss key electronic and properties of modern heterostructures. It is my pleasure to invite you to submit a manuscript for publication in this Special Issue. Original research papers, review articles, and short communications are welcome.

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma
State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
