Special Issue

Synthesis, Characterization, Theoretical Studies and Application of Nanofluids

Message from the Guest Editor

Nanofluids in general are suspension of nanomaterials in a fluid. Those suspensions modify the properties of the fluid itself. Research efforts have been devoted to the study of nanofluids for cooling, energy storage, heating, boiling, solar applications and from a theoretical modelling viewpoint. It is my pleasure to invite you to publish your research on materials works in full papers, short communications, or reviews in the *Materials* Special Issue, "Synthesis, Characterization, Theoretical Studies and Application of Nanofluids." This Special Issue will attempt to cover all types and aspects of the studies on the synthesis, energy, lubrication and theoretical modelling of nanofluids.

Guest Editor

Prof. Dr. Antonio Sánchez-Coronilla
Physical Chemistry Department, Faculty of Pharmacy, University of Seville, Sevilla, Spain

Deadline for manuscript submissions

closed (20 June 2023)

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
