Bioactive 2D Materials

Message from the Guest Editors

This Special Issue of *Materials*, entitled “Bioactive 2D Materials” will address these issues and outline new directions in the study of the bioactivity and toxicology of 2D materials. Papers focused on elucidating mechanisms of action in relation to specific properties of 2D nanostructures are welcome. In addition, this Special Issue aims at highlighting studies on various bioactive 2D materials with multiple functionalities. We kindly invite the community to submit high-quality contributions to this Special Issue. Reviews and original research articles are all welcome.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.
