

## Special Issue

# Bioactive and Therapeutic Dental Materials

### Message from the Guest Editor

This Special Issue will focus on bioactive dental materials for application in preventive and restorative dentistry, as well as in endodontics in the form of adhesives, resin-based composites, pastes, varnishes, liners and dental cements. Special attention will be given to bioactive materials developed to induce cells differentiation/stimulation, hard tissue formation and exert antimicrobial actions. New innovations are necessary to continue to help reinforcing existing technologies and to introduce new paradigms for treating dental disease and restoring teeth seriously compromised by caries lesions via biomimetic and more biological operative approaches. *Guest Editor* Salvatore Sauro **Keywords:** Remineralization; Antibacterial; Tissue engineering; Regeneration; Bioactive; Biocompatibility Therapeutic dental materials
