# Special Issue

# Materials Used in Conservation and Restoration Applications

## Message from the Guest Editors

Traditional and recent materials are extending the frontiers of application, leading to improvements in the environmental impact and sustainability. However, the material properties as related to their compatibility, performance, reversibility, and long-term durability should be evaluated for general or precise applications. This Special Issue focuses on the study of classic materials, such as ceramics, glass, glazing, wood, metals, alloys, textiles, earth, stone, mortars, renders, plasters, pigments, and paper, as well as modern materials (nano, composite, hybrid, or bio-based) used in conservation and restoration applications.

## Guest Editors

Prof. Dr. Eduardo Ferraz
Prof. Dr. Joao Coroado
Prof. Dr. Ricardo Triães

## About the Journal

### Message from the Editorial Board

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### Editors-in-Chief

Prof. Dr. Maryam Tabrizian
1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma
State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

### Author Benefits

**Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:**

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
