

Special Issue

Durability of Reinforced Concrete Structures under Environmental Actions and Mechanical Loads

Message from the Guest Editors

The Special Issue aims to provide recent innovations in the performance evolution of concrete structures subjected to various aggressive environmental and mechanical loads. The scope of this Special Issue includes (but is not limited to) experimental study and numerical simulation of the durability-related issues of material deterioration and structural responses. Potential topics include (but are not limited to) the following:

- Deterioration of concrete structures under environmental actions and mechanical loads;
- Transport process;
- Corrosion;
- Numerical modeling and investigation;
- Mechanical performance of concrete structures;
- Diagnosis of structural deterioration;
- Prevention, protection, and rehabilitation.

Assistants

Guest Editors

Prof. Dr. Chuanqing Fu

Dr. Amir Poursaee

Dr. Zheng Dong

Dr. Zhilu Jiang

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
