

Special Issue

Advances in Functional Soft Materials

Message from the Guest Editor

Soft materials are a condensed matter that can be deformed or reshaped, generally at room temperature. The range of soft materials is very broad. Some of the most important examples include polymers, gels, elastomers, colloids, liquid metals, and biomaterials, such as proteins and cells. Compared with hard materials, soft materials can have advantageous properties in terms of flexibility, moldability, processability, cost-effectiveness, biocompatibility, etc. Soft materials have actively been adopted to numerous applications, ranging from cosmetics, food products, and packaging materials to energy devices, robotics, and biomedical applications. As interest in wearable/biocompatible devices increases, soft materials are attracting more and more attention. Recently, many efforts have been made to develop functional soft materials with a wide variety of functionalities, for example, stretchability, biodegradability, self-healing properties, stimuli-responsiveness, and so on.

In this Special Issue, recent trends and developments in technologies related to functional soft materials will be highlighted and discussed.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma

State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Multidisciplinary) / CiteScore - Q1 (Condensed Matter Physics)
