

Special Issue

Recent Developments in Geopolymers and Alkali-Activated Materials

Message from the Guest Editor

The Special Issue, “Recent Development in Geopolymers and Alkali-activated materials”, will address advances in characterization, processing, scale-up, and commercialization of various types of geopolymers, geopolymer composites and alkali-activated materials. Original papers are solicited on all types of geopolymers and alkali-activated material production technologies. Of particular interest are recent developments in advanced processes, characterization, performance, and commercialization. Articles and reviews dealing with geopolymers and alkali-activated materials for different market applications, including a substitute for Portland cement with special purposes such as ash nuclear waste storage, fire-resistant building materials, ceramic precursors as well as other niche applications, are very welcome.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
