Functional Materials Based Human-Machine Interactivities

Message from the Guest Editors

With the fast development of material science and engineering, the field of human-machine interactivity (HMI) is experiencing a great change. Conventional mouse and keyboard based HMIs are being replaced by functional materials based flexible touch interfaces and wearable devices. HMIs once only depicted in science fictions are becoming a reality. Diverse novel human-machine interactive systems that based on functional materials such as piezoelectric, piezoresistive and pyroelectric, are continuously reported by researchers all around the world. Academia and industry are paying boosting attentions to this hot area, generating fruitful new and advanced prototypes and products for customers. Please see more details in the following link: https://www.mdpi.com/journal/materials/special_issues/human_machine_interativities

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
