

## Special Issue

# Lanthanide-Based Multifunctional Materials

### Message from the Guest Editor

This Special Issue aims to address both scientists working in the field of lanthanide-based compounds and materials, as well as researchers whose field of interest is mainly multifunctional materials. Multifunctional Materials (MFM) form part of the broader group of Multifunctional Materials Systems (MFMS). This Special Issue will exploit and evidence the importance and immense potential of lanthanide-based compounds in the world of MFMs. Many scientists working in the field of lanthanide chemistry and lanthanide-based materials science might not even be aware that actual multifunctional materials have been synthesized in their research group in the past. Reasons for this lie in the unique and cross-disciplinary properties of the lanthanide elements. The same lanthanide ion may not only be used to form highly porous molecular frameworks, the same framework material might also exhibit unique magnetic or fluorescence properties. It is my pleasure to invite you to submit a manuscript for this Special Issue. Full papers, communications, and reviews are all welcome.

## About the Journal

### Message from the Editorial Board

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### Editors-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma

State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Condensed Matter Physics)
