Special Issue

Advanced Modification Methods to Improve the Performance of Thin Films and Coatings

Message from the Guest Editor

In recent decades, an increase in the quantity of scientific publications on surface modification has been noticed, which confirms the necessity of conducting this scientific research. This increased interest in surface modification is the result of the growing need for constructional materials that exhibit increased wear resistance, and a low-friction coefficient or biocompatibility. We invite you to present your valuable research focused on the possibility to prepare a material surface as well as obtain an interlayer of modified metallic, polymeric or ceramic substrate in this Special Issue. The topics of interest include but are not limited to (i) diffusion layers, (ii) plasma modified surfaces, (iii) heat treatment methods, and (iv) pre-functionalization processes.

About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. Materials provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada 2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
