

Special Issue

Leveraging Advancements in Nanomaterials: Metrology, Synthesis and Properties for Biomedical Applications

Message from the Guest Editor

To participate in this special issue, I invite all researchers and researchers involved in the nanoworld. All issues related to the nanoworld, from production and metrology, to application in real sectors of the economy, will be considered. Review articles are welcomed, as well as articles devoted to the prospects for the development of this field of science in the future. The main topics of the special edition are listed below:

- Methods for obtaining nanomaterials (laser ablation, explosion, "green" synthesis, etc.)
- Methods for obtaining nanostructured materials (laser ablation, etching, chemical structuring methods, etc.)
- Methods for assessing the physical properties of nanomaterials and composite materials based on them (any physical or chemical methods of analysis)
- Laser and optical technologies for the study of nanomaterials (microscopy, spectroscopy, luminescence analysis etc.)
- Metrology of nanomaterials (any physical or chemical methods of analysis)
- Biomedical application of nanomaterials or materials (targeted delivery, controlled release, new composite materials, materials for prosthetics, etc.)
- Application of nanomaterials in the food industry and agriculture.

Guest Editor

Dr. Aleksander V. Simakin

About the Journal

Message from the Editorial Board

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editors-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma

State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
