

Special Issue

Targeted Drug Delivery

Message from the Guest Editors

This Special Issue of *Materials* is open to papers focusing on recent developments in the field of targeted drug delivery, either for nanometric (e.g., liposomes, micelles, inorganic nanoparticles, virus like particles, artificial cells) or molecular (antibodies and their fragments, penetrating peptides, etc.) carriers.

Contributions reporting image-guided approaches of targeted drug delivery are also welcome. Our intention is to awaken the material science, chemistry, and biology communities to the role of targeted drug delivery systems in the rise of molecular and personalized medicine. Thus, we would be very glad if you consider contributing to this issue by submitting an article (review, research paper, or communication) in one of the topics mentioned above. We are certain your contribution will be inspiring to other scientists engaged in this flourishing field, which will most definitely contribute to the development of more efficient and more selective anticancer therapies in the years to come. About the Journal

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Condensed Matter Physics)
