

## Special Issue

# New Trends in Polymeric and Biocomposite Material Applications

### Message from the Guest Editor

The composite is the millennium strategy for the future of human existence. A well-organized social structure, social composite or nature–natural composite is the road to success. The biopolymers and the biocomposites through which a product is intelligently recreated starting from the existential principle of life represent the natural engineering solution of life in the conditions of a dynamic globalized system with unpredictable demands. Materials' progressive substitution using biodegradable polymers and biobased polymers for circular economy is now wide diffused, with applications using bioplastic, bioplastic durable drop-ins involved all the industrial world. Research development on biocomposites and biocomposite products concerns organic constituents of the composite product: bio-resin, reinforcing element, gel-coat, wax, and technologies of bioproducts. Lastly, new design concepts based on biomimetic materials and products merge well with polymeric and biocomposite material applications.

## About the Journal

### Message from the Editorial Board

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

### Editors-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada
2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Prof. Dr. Yuguang Ma

State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Condensed Matter Physics)
