Deadline for manuscript
submissions:

closed (28 March 2022)

Message from the Guest Editors

The main objective of this Special Issue of *Mathematics* is to publish original works focused on the study of these types of models. Among them, we can cite stochastic processes, models derived from the theory of stochastic systems, functional data models, and linear models. Both the probabilistic study of the introduced models and the application to research areas are welcome, as well comparison studies between models that can be applied to the description of a specific phenomenon.

Keywords

- Modelling by stochastic processes
- Dynamic prediction
- Dynamical systems estimation
- Functional data models
- Computational methods for dynamical models
- Model selection
- Applications in survival theory, medicine, biosciences, engineering, and other areas of interest

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and
Informatics, De Montfort
University, The Gateway,
Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
