Message from the Guest Editors

Dear Colleagues,

In the last few decades, theories of the ordinary or partial differential equations has become a rapidly growing area of research. The attractiveness of this field not only derives from theoretical interests, but also differential equations, which have many applications in several phenomena observed in applied sciences. In particular, mathematical biology has attracted many researchers' interests. We invite researchers to submit original research articles as well as review articles on theory of ordinary or partial differential equations and their applications to mathematical biology.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
