Message from the Guest Editors

Computational intelligence includes algorithmic techniques that have established themselves as effective and viable mathematical tools for several research and application areas. In general, computational intelligence includes neural networks, fuzzy logic, neuro-fuzzy networks, evolutionary computation, and machine learning.

The implementation of computational intelligence in image processing and computer vision has been effectively studied by many scholars who are interested in developing new approaches, in both research and real-world problems.

Recently, driven by the success of computational intelligence in image processing and computer vision, there is an increasing interest among many researchers in integrating computational intelligence techniques in software engineering.

The aim of this Special Issue is to focus on combining the abovementioned frameworks into a very interesting and fruitful interdisciplinary research area with promising opportunities.

School of Computer Science and
Informatics, De Montfort
University, The Gateway,
Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
