**Prof. Dr. Predrag S.
Stanimirovic**

Faculty of Sciences and
Mathematics, University of Niš,
Višegradska 33, 18106 Niš, Serbia

Deadline for manuscript
submissions:

closed (31 March 2024)

Message from the Guest Editors

Intelligent computing has greatly expanded the scope of computing, extending it from traditional computing on data to increasingly heterogeneous computing paradigms. At the same time, the majority of machine-learning methods are based on optimization theory and optimization algorithms, minimizing the intercluster distances or maximizing the Rand index in the cluster analysis, minimizing error in the regression, minimizing error rate in classification problems, etc.

This Special Issue aims to be a platform to share the recent advances in topics such as (non-exhaustive list):

- AutoML, self-configuring, adaptive and self-adjusting methods for optimization and machine learning;
- Methods of optimization and machine learning intended for hardware implementation;
- Mathematical optimization;
- Multiobjective optimization;
- Evolutionary computation;
- Fuzzy systems;
- Parallel algorithms for optimization and machine learning;
- Hybrid optimization algorithms and algorithmic combinations;
- Optimizing artificial neural networks;
- Optimization software and decision support systems;
- Applications of intelligent computing.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and
Informatics, De Montfort
University, The Gateway,
Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
