### Message from the Guest Editor

Dear Colleagues,

This Special Issue is a continuation of the previous successful Special Issue “Inequalities”.

Inequalities often appear in various fields of natural sciences. Nowadays, researchers are still improving and/or generalizing famous classical inequalities. That is, inequalities are being actively studied by mathematicians. Moreover, classical inequalities can be applied in engineering fields, and a newly obtained inequality is beautiful. Such beauty may attract one to the study of inequalities.

In this Special Issue, we call for papers on new results for mathematical inequalities, as well as new proofs for well-known inequalities or short notes with interesting results in open problems. We welcome all kinds of mathematical inequalities, such as scalar inequalities on summation, inequalities on integral form, operator/matrix inequalities, and norm inequalities.

Prof. Dr. Shigeru Furuichi

## Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

**Journal Rank:** JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
