Iterative Methods for Solving Nonlinear Equations and Systems

Guest Editors:

Prof. Dr. Juan Ramón Torregrosa Sánchez

Institute for Multidisciplinary Mathematics, Universitat Politècnica de València, 46022 València, Spain

Prof. Dr. Alicia Cordero

School of Telecommunications Engineering, Universitat Politècnica de València, 46022 Valencia, Spain

Dr. Fazlollah Soleymani

Institute for Advanced Studies in Basic Sciences, Zanjan, Iran

Deadline for manuscript submissions: closed (30 September 2019)

Message from the Guest Editors

Solving nonlinear equations and systems is a non-trivial task that involves many areas of Science and Technology. Usually, it is not affordable in a direct way, and iterative algorithms play a fundamental role in their approach. This is an area of research that has experienced exponential growth in the last years.

The main theme of this Special Issue, which is not the unique, is the design, analysis of convergence, and stability and application of new iterative schemes for solving nonlinear problems to practical problems. This includes methods with and without memory, with derivatives or derivative-free, with real or complex dynamics associated with them and an analysis of their convergence that can be local, semi-local, or global.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University, The Gateway, Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The iournal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering sociology. particularly those that and stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), RePEc, and other databases. **Journal Rank:** JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
