

Mathematical Methods for Operations Research Problems

Guest Editor:

Prof. Dr. Frank Werner

Faculty of Mathematics, Otto-
von-Guericke-University, P.O. Box
4120, D-39016 Magdeburg,
Germany

Deadline for manuscript
submissions:

closed (30 June 2021)

Message from the Guest Editor

We invite you to submit your latest research in the area of operations research to this Special Issue, “Mathematical Methods for Operations Research Problems”, in the journal *Mathematics*. High-quality papers are solicited to address both theoretical and practical issues in the area of operations research. Submissions that present new theoretical results, models and algorithms, as well as new applications, are welcome. Potential topics include, but are not limited to, applications of linear and nonlinear integer programming, optimization problems on graphs, project management, scheduling, logistics and transportation, queueing theory, and simulation.

Keywords

- Linear and nonlinear integer programming
- Dynamic programming
- Combinatorial optimization
- Optimization on graphs
- Project management
- Scheduling
- Optimization in logistics
- Vehicle routing and other transportation problems
- Control-theoretic problems
- Decision theory
- Manufacturing, supply chain management
- Multi-criteria decision making
- Stochastic models
- Risk management
- Packing
- Queueing theory

mdpi.com/si/65296

Special Issue

- Exact solution procedures

- Advanced heuristics and metaheuristics

Informatics, De Montfort
University, The Gateway,
Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
