Mathematical Approaches to Modeling, Optimally Designing, and Controlling Electric Machine

Guest Editors:

Dr. Vladimir Prakht

Department of Electrical Engineering, Ural Federal University, 620002 Yekaterinburg, Russia

Dr. Mohamed N. Ibrahim

Department of Electromechanical, Systems and Metal Engineering, Ghent University, 9052 Ghent, Belgium

Dr. Aleksey S. Anuchin

Automated Electric Drives Department, Moscow Power Engineering Institute, 111250 Moscow, Russia

Deadline for manuscript submissions:

closed (30 November 2021)

Message from the Guest Editors

This Special Issue aims to collect papers reporting the mathematical approaches to modeling, optimal design, and control of electric machines. The main topics of this Special Issue include, but are not limited to:

- Analytical models (electromagnetic, thermal, etc.) of electric machines

- Numerical models (finite element method, boundary element method, equivalent circuits, etc.) of electric machines

- Multi-physics models of electric machines
- Lifetime modeling of electric machines
- Losses modeling of electric machines
- Optimal design methodologies of electric machines
- Optimization techniques for fast and efficient optimal design of electric machines
- Offline and online methods for identification of electric machine parameters

machine

- Field-oriented control and direct torque control
- Model predictive control of electric machines
- Self-sensing control of electric machines
- Robust control of electric machines
- Optimal control tec

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University, The Gateway, Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The iournal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering sociology. particularly those that and stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), RePEc, and other databases. **Journal Rank:** JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
