Deadline for manuscript submissions:
31 January 2025

Message from the Guest Editor

Dear Colleagues,

When exact mathematical results are not available, or too unwieldy to be of much use, we have the option of modifying our original orientation to derive just concise and precise estimates of quantities. The methods in asymptotic analysis are incredibly powerful in deriving approximate solutions of problems. This Special Issue aims to collect and disseminate new advances in asymptotic analysis, especially its application in combinatorics.

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.
Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
