Message from the Guest Editors

This Special Issue of Mathematics is devoted to topics in artificial intelligence and algorithms, including theory and applications, as well as applied mathematics. The focus will be on techniques for improving the performance of the AI framework in different application domains. Potential contributions may include but are not limited to:

- deep learning
- statistical analysis
- pattern recognition
- natural language processing
- computer vision
- image processing
- network security
- Internet of Things (IoT)
- blockchain
- model visualization
- optimization
- differential equations.

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.
Journal Rank: JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
