31 October 2024

Message from the Guest Editor

Dear Colleagues,

We are pleased to announce this Special Issue of the journal *Mathematics* entitled “Multi-Attribute Decision Making and Intelligent Computing in Smart Governance”. This initiative focuses on the theoretical and practical progress of multi-attribute decision making and intelligent computing methods, with special attention on their innovative applications in the field of smart governance. This Special Issue will focus on the development of multi-attribute decision making and intelligent computing methods, while also focusing on their applications in areas such as risk governance, digital governance, emergency management, and smart cities.

- multi-attribute decision-making method in a linguistic environment, a fuzzy environment, a probabilistic environment
- multi-attribute decision-making method based on the Dempster–Shafer theory
- applications of multi-attribute decision making and intelligent computing methodologies in multi-sensor information fusion, risk decisions, smart cities, emergency management, disaster prevention and reduction, digital governance

Editor-in-Chief

School of Computer Science and
Informatics, De Montfort
University, The Gateway,
Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (*Mathematics*) / CiteScore - Q1 (*General Mathematics*)
