Deadline for manuscript
submissions:

closed (30 April 2021)

Message from the Guest Editor

The unique existence of strong solutions appearing in mathematical fluid dynamics like Navier Stokes equations, MHD, etc., is one of the main subjects in the study of nonlinear partial differential equations. Moreover, the maximal regularity and stability estimates for the linearized equations play the most important role nowadays in analysis. Due to the many recent developments in the area, I would like to organize a Special Issue contributing to this mathematical investigation.

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
