

# Special Issue

## Advances in Communication Systems, IoT and Blockchain

### Message from the Guest Editors

Today, blockchain technology (BCT), internet of things (IoT), and artificial intelligence (AI) are recognized as innovations that have the potential to improve current business processes, create new business models, and disrupt whole industries.

IoT devices in smart systems typically generate massive amounts of data. These data are often stored and processed in a centralized server. Blockchain technology could help with data standardization by setting up a harmonized digital platform for IoT data accessible to multiple parties. Due to the use of hash functions, data on blockchain systems is typically stored in one data format. Consequently, data management could be optimized by increased interoperability of stored data. Converging technologies such as BCT and/or AI/ML with IoT systems could make data management more scalable, secure, and efficient. In addition, AI offers an intelligent learning mechanism from the massive amount of time-series real-life data. Combined with AI and/or Blockchain, any smart system can address the many existing challenges.

This Special Issue is dedicated to novel articles covering BCT, AI, and ML methodologies in smart systems.

---

### Guest Editors

Dr. Sujit Biswas

Department of Computer Science and Digital Technology, University of East London, University Way, London E16 2RD, UK

Dr. Md. Shirajum Munir

Department of Computational Modeling and Simulation Engineering, Old Dominion University, Suffolk, VA 23435, USA

---

### Deadline for manuscript submissions

closed (31 August 2024)

## About the Journal

### Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics )

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
