New Advances in Social Networks Analysis

Message from the Guest Editors

Currently, social networks play a major role in our lives, and many people depend on these networks for connection and communication. A huge number of people are connected to social networks, and there has been a significant increase in information. Globally, many researchers are involved in the application of data mining and machine learning algorithms to analyse the information gained through social networks. This Special Issue of *Mathematics*, 'New Advances in Social Networks Analysis', provides an opportunity for researchers from around the world to introduce their work across aspects of social network analysis, including management, privacy, security, and advanced algorithms that analyse big data gathered from social networks. The topic is open in the field of Social Network Analysis, and the journal seeks novel contributions that help mitigate possible challenges.

Guest Editors

Dr. Suhail M. Odeh

Software Engineering Department, Bethlehem University, Bethlehem 18015, Palestine

Prof. Dr. Antonio Mora

Department of Signal Theory, Telematics and Communications, University of Granada, 18071 Granada, Spain

Deadline for manuscript submissions

closed (20 November 2024)

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
