Special Issue

Modelling and Analysis in Time Series and Econometrics

Message from the Guest Editors

We are pleased to announce the forthcoming Special Issue, "Modelling and Analysis in Time Series and Econometrics". Time series econometrics is a rapidly evolving field. Particularly, the cointegration revolution has had a substantial impact on applied analysis. This subject matter aims to highlight the role of probability and mathematical statistics in solving problems in planning microeconomic and macroeconomic systems in society. Potential applications may be concerned with, but are not limited to, finance, financial mathematics, technology, energy, industry, environment, sustainability, medicine, biology, agriculture, and climate change. This Special Issue will include both papers that develop new methodologies as well as those using known procedures for working out real-world problems. With this Special Issue, *Mathematics* also wants to promote a new generation of researchers in probability and statistics, attracting student interest to this field. We believe that your contributions will be highly valuable to make this Special Issue a great success. We look forward to receiving your papers!

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University, The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
