

Special Issue

Advances in Cryptography and Blockchain: Mathematics for Healthcare Security

Message from the Guest Editors

Emerging blockchain technology provides a decentralized platform ensuring transparency, data integrity, patient anonymity, traceability, and nonrepudiation. Furthermore, mathematics is essential in providing increased security and confirming the validity of any cryptographic or blockchain-based design. This Special Issue seeks papers on innovative cryptographic methods, new blockchain designs, or creative integrations of cryptography and blockchains in a single design to address related issues. Topics of interest include, but are not limited to, the following:

- Mathematics-based security designs for smart healthcare;
- Secure cryptographic tools or protocols for healthcare systems;
- Applied cryptography for healthcare;
- Lightweight cryptography for IoT-based healthcare communications;
- Post-quantum cryptography for healthcare;
- Secure Internet of Medical Things (IoMT);
- Blockchain-enabled designs for smart healthcare;
- Security and privacy in blockchain-based smart healthcare;
- Blockchain-based trusted protocols for healthcare communications;
- New consensus mechanisms for healthcare blockchains;
- Reliable smart contracts for healthcare communications.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
