

Special Issue

Boundary Element Methods in Engineering

Message from the Guest Editors

This Special Issue, entitled "Boundary Element Methods in Engineering", focuses on the latest developments in engineering analysis with boundary elements, mesh reduction, and other related innovative and emerging numerical methods. *Mathematics* was originally focused on the development of the boundary element method. Its scope has since been expanded to include the emerging mesh reduction and meshless methods. The aim of *Mathematics* is to promote the use of non-traditional, innovative, and emerging computational methods for the analyses of modern engineering problems.

Guest Editors

Prof. Dr. Jianming Zhang
Dr. Fenglin Zhou

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
