

Special Issue

Biostatistics and Stochastic Process Analysis

Message from the Guest Editor

This Special Issue on “Biostatistics and Stochastic Process Analysis” marks a major step forward in the convergence of mathematical statistics, biology, and medicine. This edition focuses on how advanced statistical methods can deepen our understanding of biological processes and enhance health outcomes. Biostatistics is crucial for designing biomedical research and analyzing data from clinical trials, observational studies, and genomics. It is essential for interpreting complex datasets, allowing researchers to draw dependable conclusions about health risks and the effects of treatments. Integrating stochastic process analysis into this domain introduces a more profound mathematical structure that models the inherent randomness in biological systems and the progression of diseases.

By compiling the latest methodologies and their applications, this Special Issue strives to enrich our understanding of how stochastic processes and biostatistical methods can be collaboratively employed to tackle significant issues in biology and medicine.

Guest Editor

Dr. Suvo Chatterjee

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
