

Special Issue

Operations and Supply Chain Management with the Application of Mathematical Models, 2nd Edition

Message from the Guest Editor

This Special Issue is dedicated to the application of mathematical models in operations and supply chain management to deal with various operations and supply chain practices, as well as to develop efficient and effective approaches that can be implemented to improve operations and supply chain performance. We request high-quality papers that explore state-of-the-art approaches and techniques in enabling sustainable operations and supply chain management (OSCM), as well as creative applications of mathematical models related to all aspects of OSCM.

Guest Editor

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
