## Data-Driven Approaches for Big Data Analysis of Intelligent Transportation Systems

### Message from the Guest Editor

The rapid evolution of intelligent systems has generated vast, heterogeneous datasets, demanding advanced mathematical frameworks to unlock actionable insights. This Special Issue, "Data-Driven Approaches for Big Data Analysis of Intelligent Systems," focuses on rigorous computational methodologies, including statistical learning models, optimization algorithms, and stochastic processes, to address scalability, efficiency, and robustness in intelligent systems. Key topics encompass machine learning architectures (e.g., deep neural networks and reinforcement learning), distributed computing paradigms (e.g., MapReduce and Spark), and mathematical techniques for high-dimensional data (e.g., tensor decomposition and sparse linear algebra). Computational analysis of time-series forecasting, nonlinear dynamics, and graph-based algorithms for network-structured data will be explored. Submissions should emphasize mathematical innovations, such as differential equations for predictive modeling, convex/non-convex optimization for parameter tuning, or probabilistic graphical models for uncertainty quantification.

## About the Journal

### Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
