

# Special Issue

## Applications and Analysis of Statistics and Data Science

### Message from the Guest Editors

This Special Issue aims to address the challenges and opportunities encountered while applying statistical and data science approaches across diverse domains.

Topics including but not limited to:

1. Predictive modelling: employing statistical and data science techniques to develop accurate predictive models for applications such as financial forecasting, disease prediction, customer behaviour analysis, and demand forecasting.
2. Machine learning: Exploring the integration of statistical principles and machine learning algorithms, including classification, regression, clustering, and feature selection. Topics also encompass model interpretability, fairness, and robustness.
3. Big data analytics: Tackling challenges and leveraging opportunities in analysing and extracting insights from large-scale and high-dimensional datasets. Techniques of interest include data pre-processing, dimensionality reduction, distributed computing, and scalable algorithms.
4. Time series analysis: examining advanced statistical techniques for modelling and forecasting time series data, encompassing autoregressive models and state-space models and handling seasonality and nonstationary.

---

### Guest Editors

Dr. Jinran Wu

Institute for Positive Psychology and Education, Australian Catholic University, Brisbane 4001, Australia

Prof. Dr. Fang Wang

School of Mathematics and Computational Science, Xiangtan University, Xiangtan 411105, China

## About the Journal

### Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

---

### Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,  
The Gateway, Leicester LE1 9BH, UK

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
