

Special Issue

New Advance of Mathematical Economics

Message from the Guest Editors

Mathematical modeling is a valuable tool in Business and Economics. This Special Issue aims to discuss new theoretical insights to the following sections:

Mathematical modeling of forecasting and Statistical Analysis, Econometric Models, Financial Mathematics, and Optimization of economic functions. It is our pleasure to invite you to contribute to this Issue by submitting research articles that will be subject to peer-review aiming to contribute to the development of research.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.
