

Special Issue

Quantitative Analysis and DEA Modeling in Applied Economics, 2nd Edition

Message from the Guest Editors

Quantitative analysis is an important tool for assessing the efficiency of economic processes. Mathematical modeling based on data envelopment analysis provides the measurement of relative efficiency of decision-making units. These approaches allow increasing the objectivity and scientific validity of decision making in applied economics. This Special Issue aims to contribute to the theory, methodology, analysis, applications, and strategies of modern evaluation approaches that may bring novel insights into quantitative analysis methods in the economy. Original theoretical and empirical articles containing analysis and interpretation of quantitative techniques for a wide range of problems in applied economics are accepted. Topics of interest include but are not limited to mathematical models used in business, finance, agriculture, education, energy industry, transport, culture, healthcare, regional and spatial development, public administration, and others.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
