

Special Issue

Application of Mathematical Method and Models in Dynamic System, 2nd Edition

Message from the Guest Editor

Dear Colleague, The most observed phenomena in scientific investigation and in everyday life are dynamic phenomena. The list of these phenomena is rich, including life systems, physical systems, or social systems, encompassing population growth, ecological decay, epidemics of disease, the motion of a system of particles, the behavior of an economic structure, etc. Some such phenomena are easy to understand, but others require a proper mathematical model, usually represented in terms of either differential or difference equations. This includes continuous-time dynamical systems, piecewise dynamical systems, discrete-time dynamical systems, time-delay dynamical systems, fractional order dynamical systems, and fast-slow dynamical systems, among others. The aim of this Special Issue is to establish new mathematical models and study their behavior and properties, or those of existing dynamical systems using known or new methods.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
