Metaheuristic Algorithms

Message from the Guest Editor

Metaheuristic algorithms represent a rapidly growing research domain and have recently attracted a great deal of attention; they are successfully applied in engineering, transportation, planning and scheduling, logistics and supply chains, and a broad range of other domains. Metaheuristic algorithms are widely used in combinatorial optimization to solve complex problems with non-deterministic polynomial-time hardness; they are often able to find high-quality solutions with less computational effort than other optimization methods. This Special Issue aims at gathering recent advances in metaheuristic algorithms used for both combinatorial and continuous optimization problems. We invite authors to present their original research articles as well as review articles. This Special Issue provides a platform for researchers from academia and industry to present their novel and unpublished work in this thrilling domain.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
