

# Special Issue

## Advanced Methods in Computational Mathematical Physics

### Message from the Guest Editors

This Special Issue aims to focus on advanced computational methods for the solution of mathematical physics problems and those problems arising in all areas of science, engineering application, finance and natural science whose solution is inspired by mathematical physics methods. Computational and mathematical modeling of biological, engineering, and physical systems are becoming more and more attractive and suitable for the solution of daily complex nonlinear problems. These problems can be easily solved using methods of modern advanced calculus and original, recently discovered theories and algorithms. Many mathematical physical problems follow patterns described by systems of ordinary or partial differential equations, either integer or fractional order derivatives, or described by some special functions. Some of those patterns are self-similar (fractal); at the same time, they follow the power law and have a fading memory. There are many physical problems in nature and engineering applications following such patterns, such as fluidodynamics, mechanics, elasticity, fracture mechanics, rheology, avionics, biology, relativity, geohydrology, and finance.

## About the Journal

### Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
