Special Issue

Recent Advances in Artificial Intelligence and Machine Learning

Message from the Guest Editors

With the rapid development of artificial intelligence (AI) and machine learning (ML), various intelligent models have been developed to solve practical problems in every imaginable domain. However, the implementation of AI and ML technologies faces several challenges, such as limited labeled samples, class imbalance, privacy issues, and model interpretability. This Special Issue focuses on state-of-the-art research related to the development and application of AI and ML technologies to enhance people's lives. Topics of interest include but are not limited to: 1) The applications of artificial intelligence and machine learning models in various domains; 2) Novel AI and ML methods and algorithms; 3) Interpretable artificial intelligence and machine learning for big data understanding; 4) Artificial intelligence and machine learning for computer vision; 5) Deep learning artificial intelligence and machine learning for intelligent speech; 6) Artificial intelligence and machine learning for natural language processing. 7) Deepfake and anti-spoofing techniques.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University, The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:
JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
