

Special Issue

Analysis and Mathematical Modeling of Economic - Related Data

Message from the Guest Editor

The purpose of this Special Issue is to gather contributions on recent advances in the theory and applications of mathematical and statistical models arising in economics. Papers focused on both objective economic measures and perceptions of economic-related phenomena are welcome.

- Consumer behavior
- Economic computational models
- Forecasting
- Behavioral economics
- Modeling of economic and business processes
- Quantitative methods
- Business statistics
- Economic modeling

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.
