

Special Issue

Big Data and Complex Networks

Message from the Guest Editor

Big data refers to heterogeneous data sets characterized by huge volume, diverse types, complex interaction relations and dynamic changes. Numerous studies treat problems with big data as problems of typical complex systems. As an effective model of complex systems, complex networks that abstract individuals as nodes and the relationships between individuals as links effectively depict the system operation mechanisms. Recently, wide attention has been devoted to solving big data problems based on complex networks, but there are still gaps to be filled, such as how to realize mapping between big data and complex network space and how to mathematically describe the relationship between layers of complex network. Hence, this Special Issue focuses on the application of complex network theory in solving problems of big data analysis, so as to provide effective methods for mining the characteristics, laws and mechanisms of big data.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
