## Business Games and Numeric Simulations in Economics and Management

### Message from the Guest Editors

Business games and simulations are becoming increasingly popular in education and human resource management as they increase the level of engagement of those learners who are digital natives. However, the use of games and simulations is a multidisciplinary activity and requires facing several challenges of different natures. First of all, good business games and simulations should reflect real-world managerial relationships, raising the importance of their business modeling and setting up the optimization algorithms. Business games and simulations are often virtual games, which require the programming of a game engine and game scenarios, as well as testing and optimization. Business games and simulations have to combine real business world complexity with being playable. On the other hand, they are used in education and human resource management, which requires implementing them into the educational processes of teachers and game instructors in different managerial activities.

## About the Journal

### Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
