

Special Issue

Recent Advances in Chaos, Fractal and Complex Dynamics in Nonlinear Systems

Message from the Guest Editors

Chaos is a common phenomenon in nature and exists in various nonlinear systems. We organized this Special Issue to collect the latest progress in the research of nonlinear dynamics, chaos, fractal and other nonlinear phenomena in nonlinear systems such as ordinary differential systems, partial differential systems, fractional order systems and discrete systems. We sincerely invite and welcome you to submit the latest articles such as reviews, original papers and comments. The topics are nonlinear dynamics in systems such as ordinary differential systems, partial differential systems, fractional order systems or discrete systems, mainly including new theories, new discoveries and new applications such as chaos, bifurcation and fractal, but they are not limited to these topics.

- The latest discovery of chaos and various bifurcation phenomena in nonlinear systems.
- Fractal phenomena in fractional order systems.
- The latest development of chaos test methods.
- Attractors and hidden attractors in nonlinear systems.
- Measurement of fractal sets in nonlinear systems.
- The latest application research progress of chaos and fractal.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
